

FIXED WALL SUPPORT

With tilt system

Fixed wall support with tilt system

Fixed wall support allows you to install the PSBOX15 in the back wall of the auditorium when a lifting features is not needed. It is economic and practical. It's tilting base facilitates the location of the PSBOX on top of the bracket and, later, the installation of the projector. Once the PSBOX and the projector are installed, the base can be slid away from the back wall to permit the access to the back o the projector between the wall and the PSBOX15
