P-CWP8/4/2
Custom Wall Panel for Cinema & AV

Get your panels with connectors and labels installed

Sturdy wall mounted connection panel including wallplate and enclosure.

Both manufactured in 1mm. steel and black powder coated to avoid glittering. Wallplates provide 8, 4 or 2 cutouts, specifically designed to fit standard "D shape" connectors. It features connectors for computer, video and audio.

The enclosure is 9,3 cm deep, to allow the installation of any audio or video connector and leave enough space for the cables coming into the box. At the bottom of the enclosure, a cutout of 25 mm (P-CWP2) or 32 mm (P-CWP4) or two of 32mm (P-CWP8), provides inlets for the cabling.

At the back side, the enclosure features 4 holes to fix it to the wall. Above each cutout, there is space to fit the label for the connector and, on the upper part of the plate, a label naming the panel. The P-CWP panels can be supplied with the desired connectors and indelible labels on demand.
