# P-TMS
## Theatre management Software

**P-TMS is the new software tool from Proyecson specifically adapted for the control and monitoring of digital movie theaters.**

P-TMS features real-time playback monitoring, shows and play lists creation, content management and scheduling. Available from a single user interface. It also allows KDM management to easily monitor their validity and check on expiration dates.

Creation of multiple users accounts with different access and editing levels is possible, allowing monitoring and configuring accounts through a single login.

Will work with Doremi, Dolby and GDC Digital Cinema servers. Thanks to its development based on Java, the P-TMS will smoothly run on any Windows, Linux or Mac system.

- *Cross-platform (Windows, Linux, Mac OS X)*
- *Support for all major brands of servers: Dolby, Doremi and GDC (Qube and Barco available soon)*
- *Support for all major brands of projectors: Barco, NEC, Kinoton and Christie.*
- *Supports automation systems via Ethernet.*
- *Supports Dolby processor (CP650, CP750)*

- *Ingestion of content from servers and libraries.*
- *Create / Edit / Remove shows.*
- *Play / load of shows and movies.*
- *Create / Edit / Delete schedules.*
- *Playback Media in manual and automatic or in schedule mode.*
